INTERNAL GUIDE: MR FEROZ AMER
ASSISTANT PROFESSOR
DECCAN COLLEGE OF ENGINEERING AND
TECHNOLOGY

Presentation Outline

What We're Covering

- Introduction
- Existing System
- Draw Backs of existing System
- Proposed System
- Advantages of the proposed system
- Technologies used
- Conclusion
- Future Enhancements

What exactly is Communication?

A brief Definition

Transfer of information from the sender
to receiver

Present System

Whatsapp

Gmail

Draw Backs of Existing system

PRIVACY BREACH

Personal Information is exposed

NO PRIVATE LIFE

Personal and Professional life gets mixed up

SPAM

With the information gathered individual can be spammed

PROFICIENT COMMUNICATOR

[CHATTING APPLICATION BASED ON CLOUD COMPUTING]

WEB APPLICATION

FRIENDLY USER INTERFACE

REQUIRES A DEVICE ACCESS TO INTERNET

Proposed System

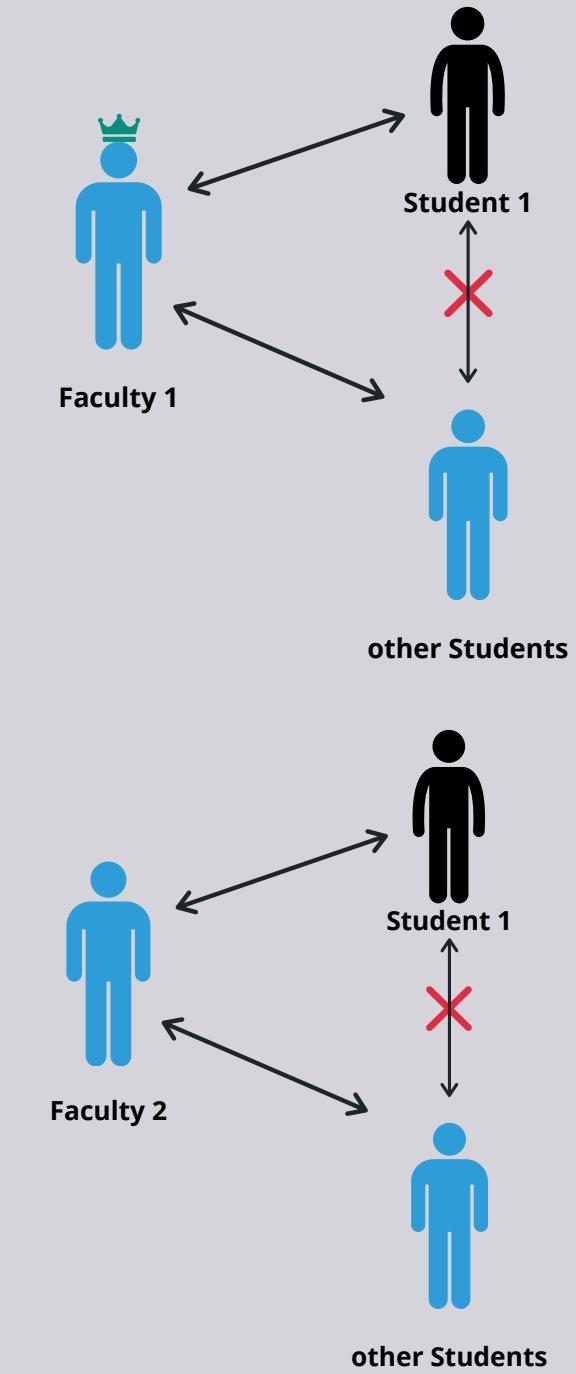

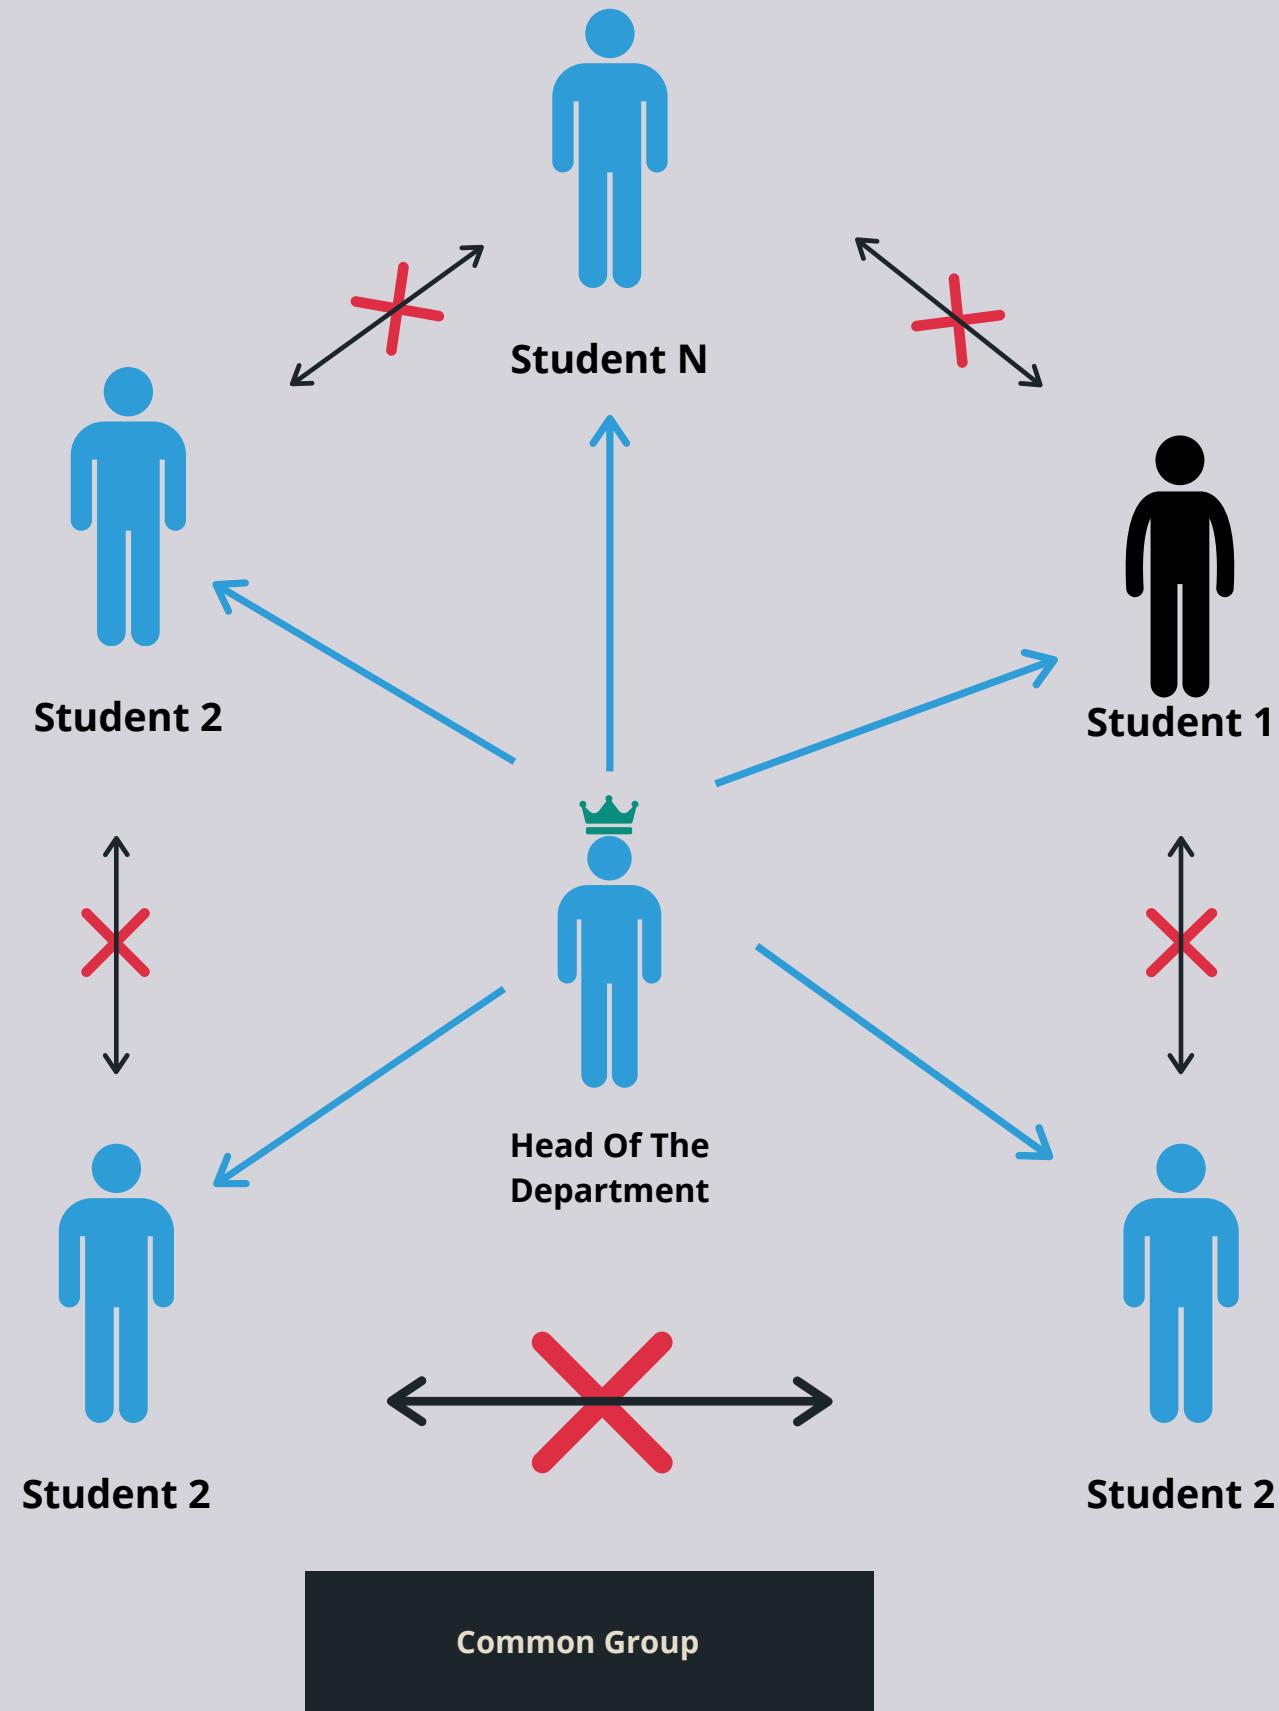

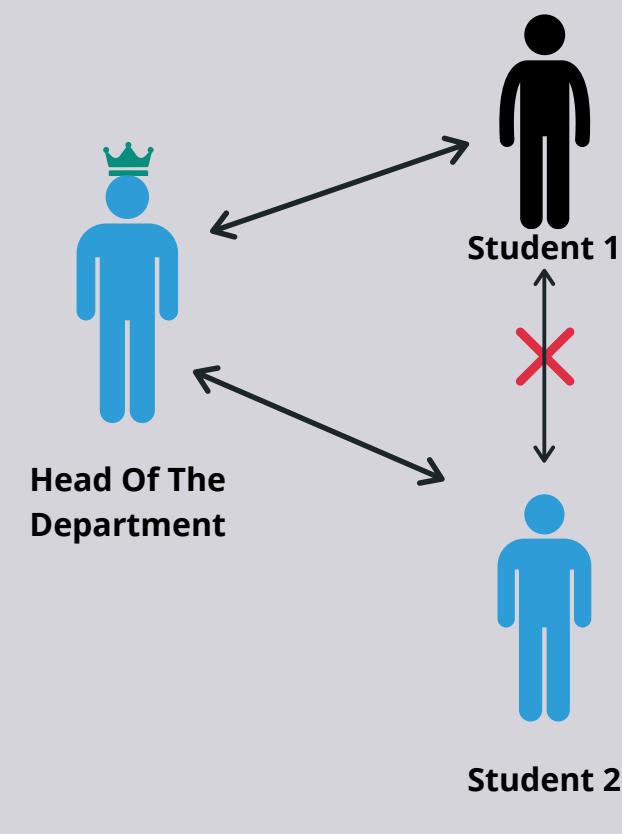

Advantages of Proposed system

FRIENDLY USER INTERFACE

PRIVACY BREACH IS
AVOIDED

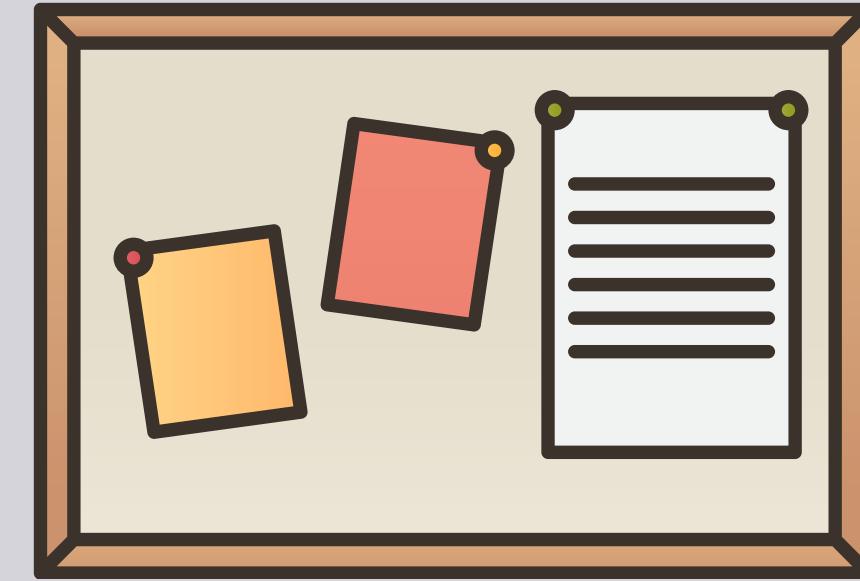

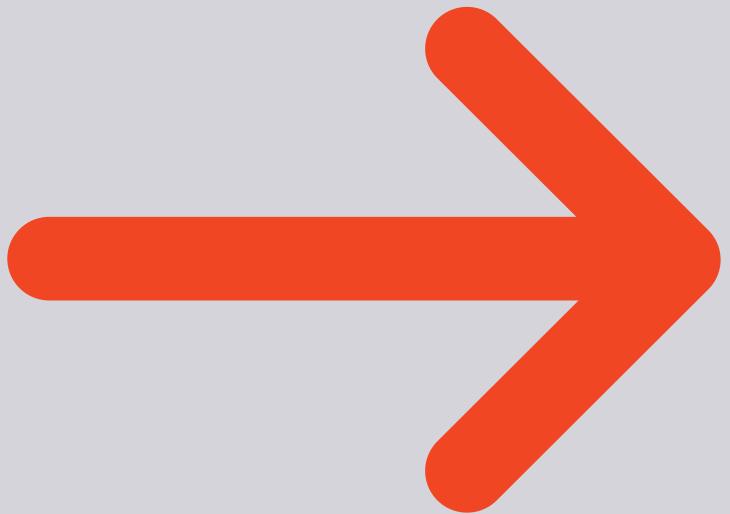

CAN BENEFIT BOTH THE
FACULTY AND THE
STUDENTS

How It works

One to One communication between Faculty and students

how it works

Notice Board

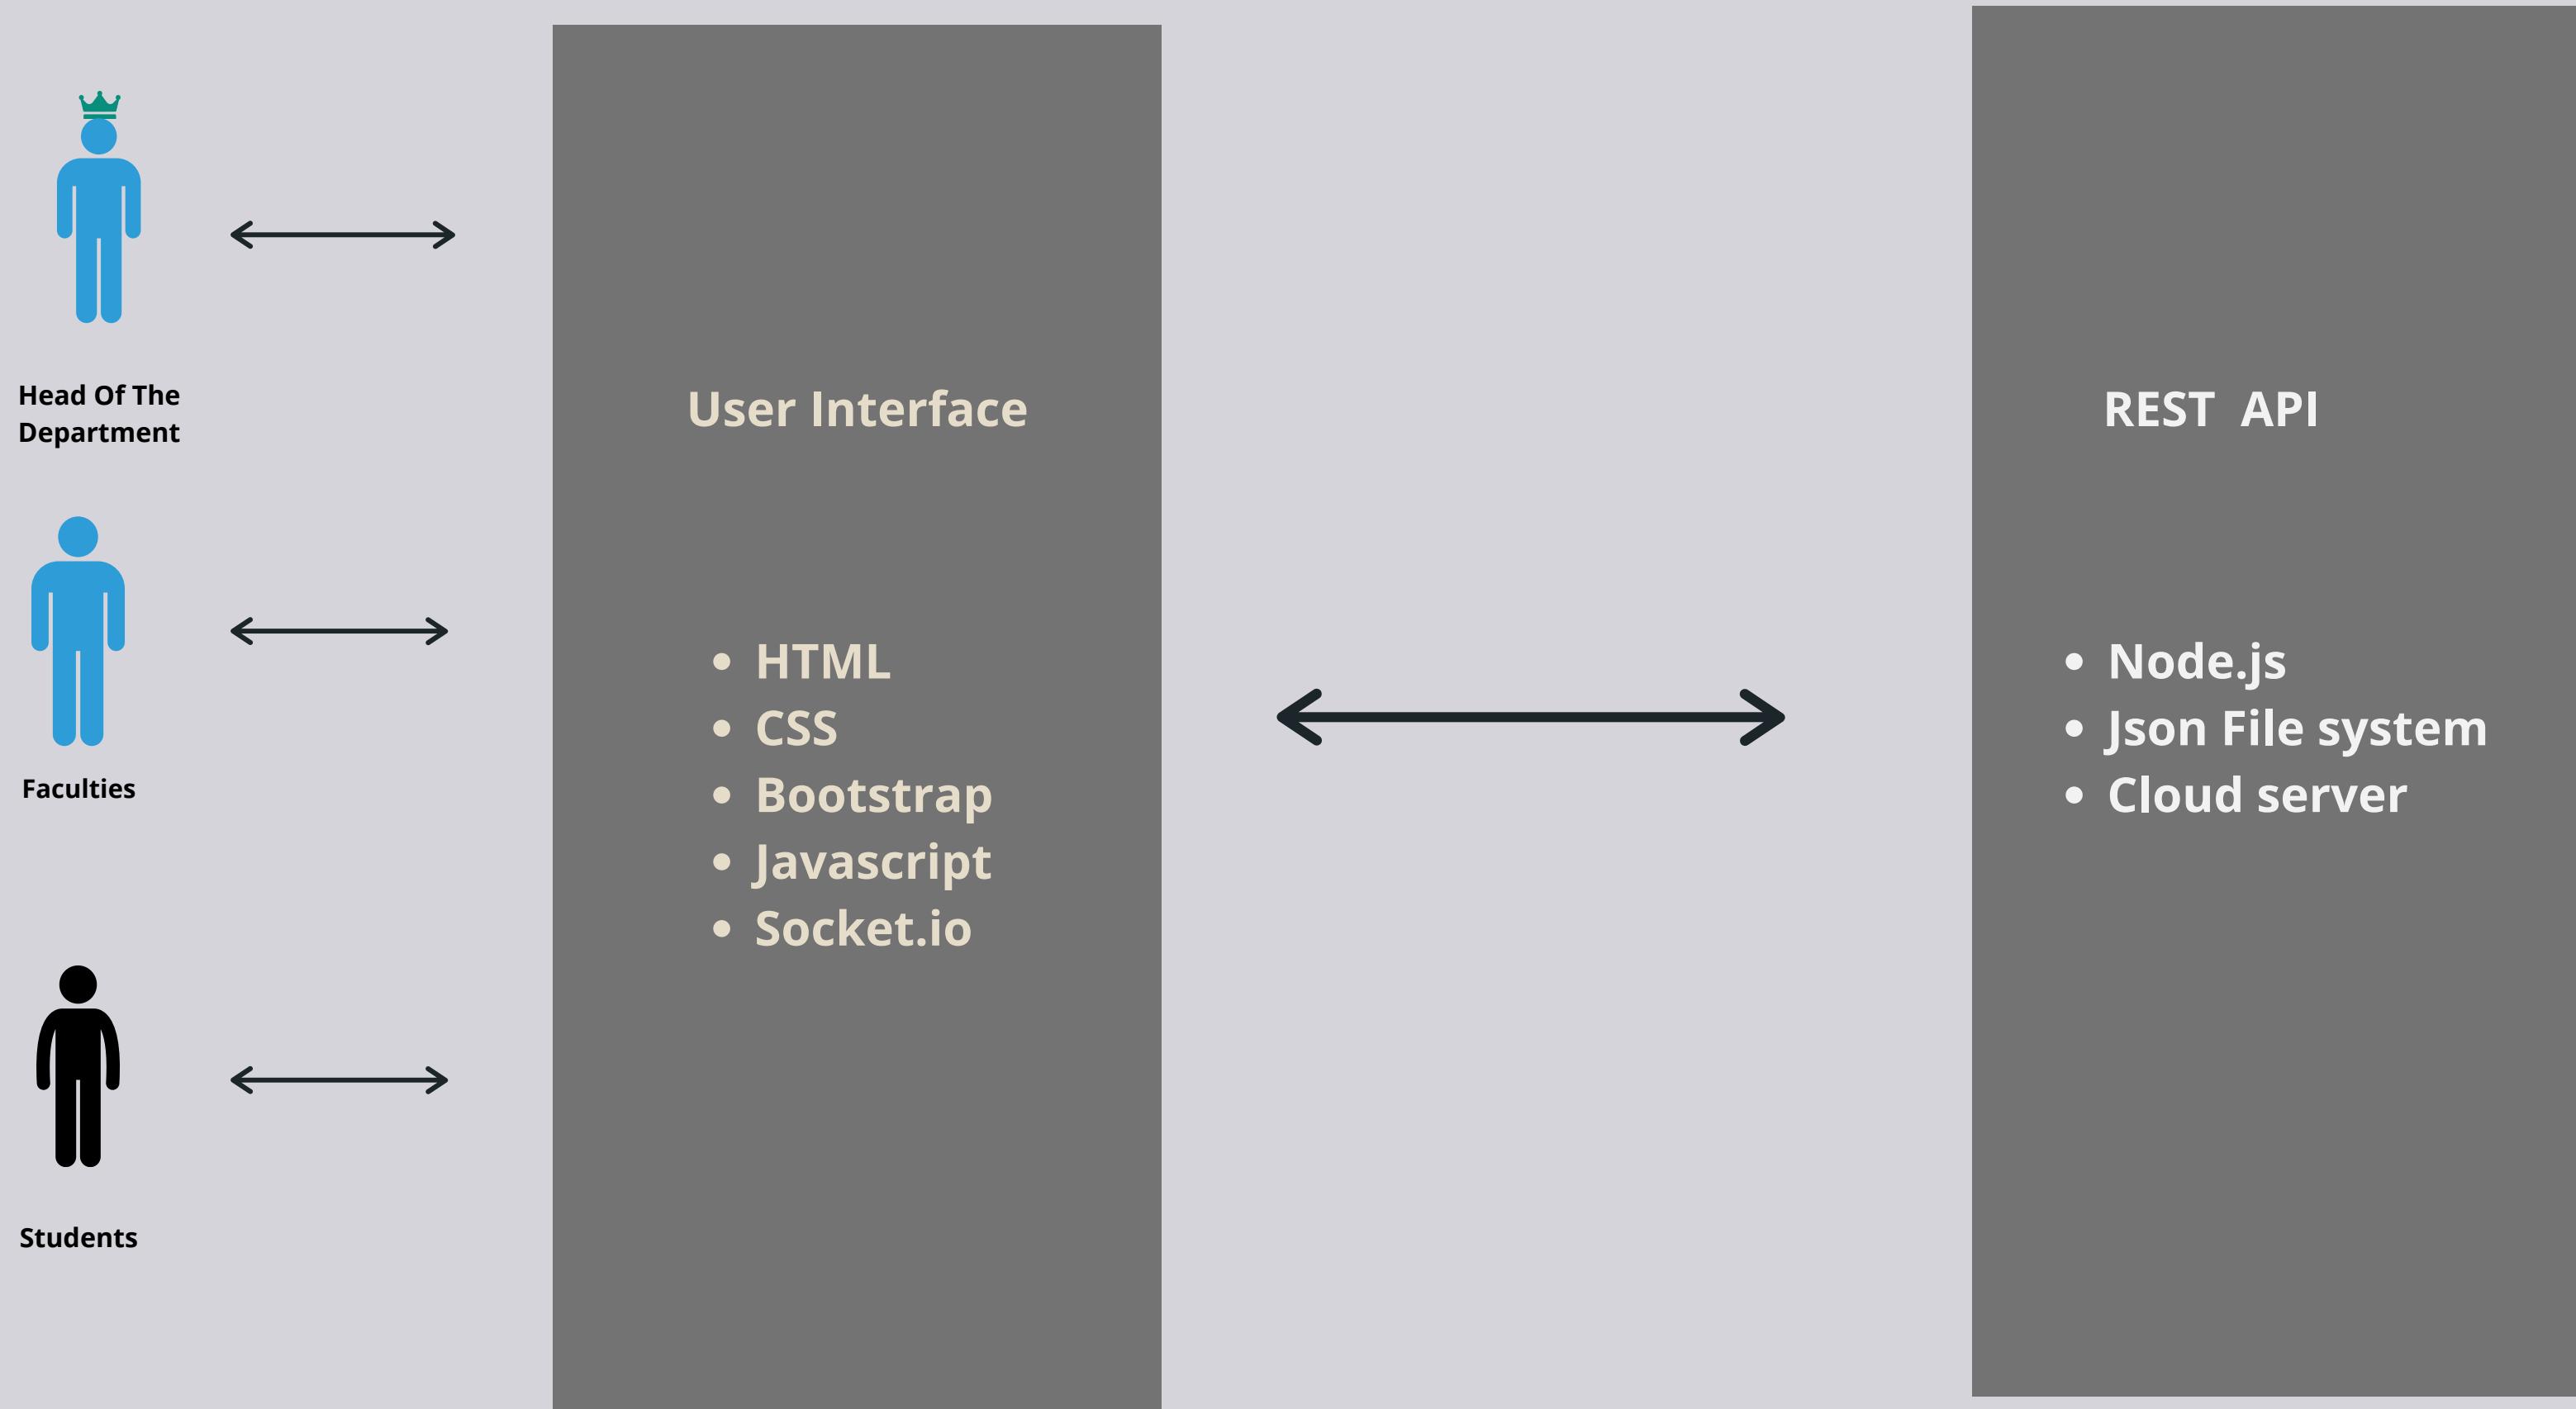

**Works the same with
zero Vulnerabilities**

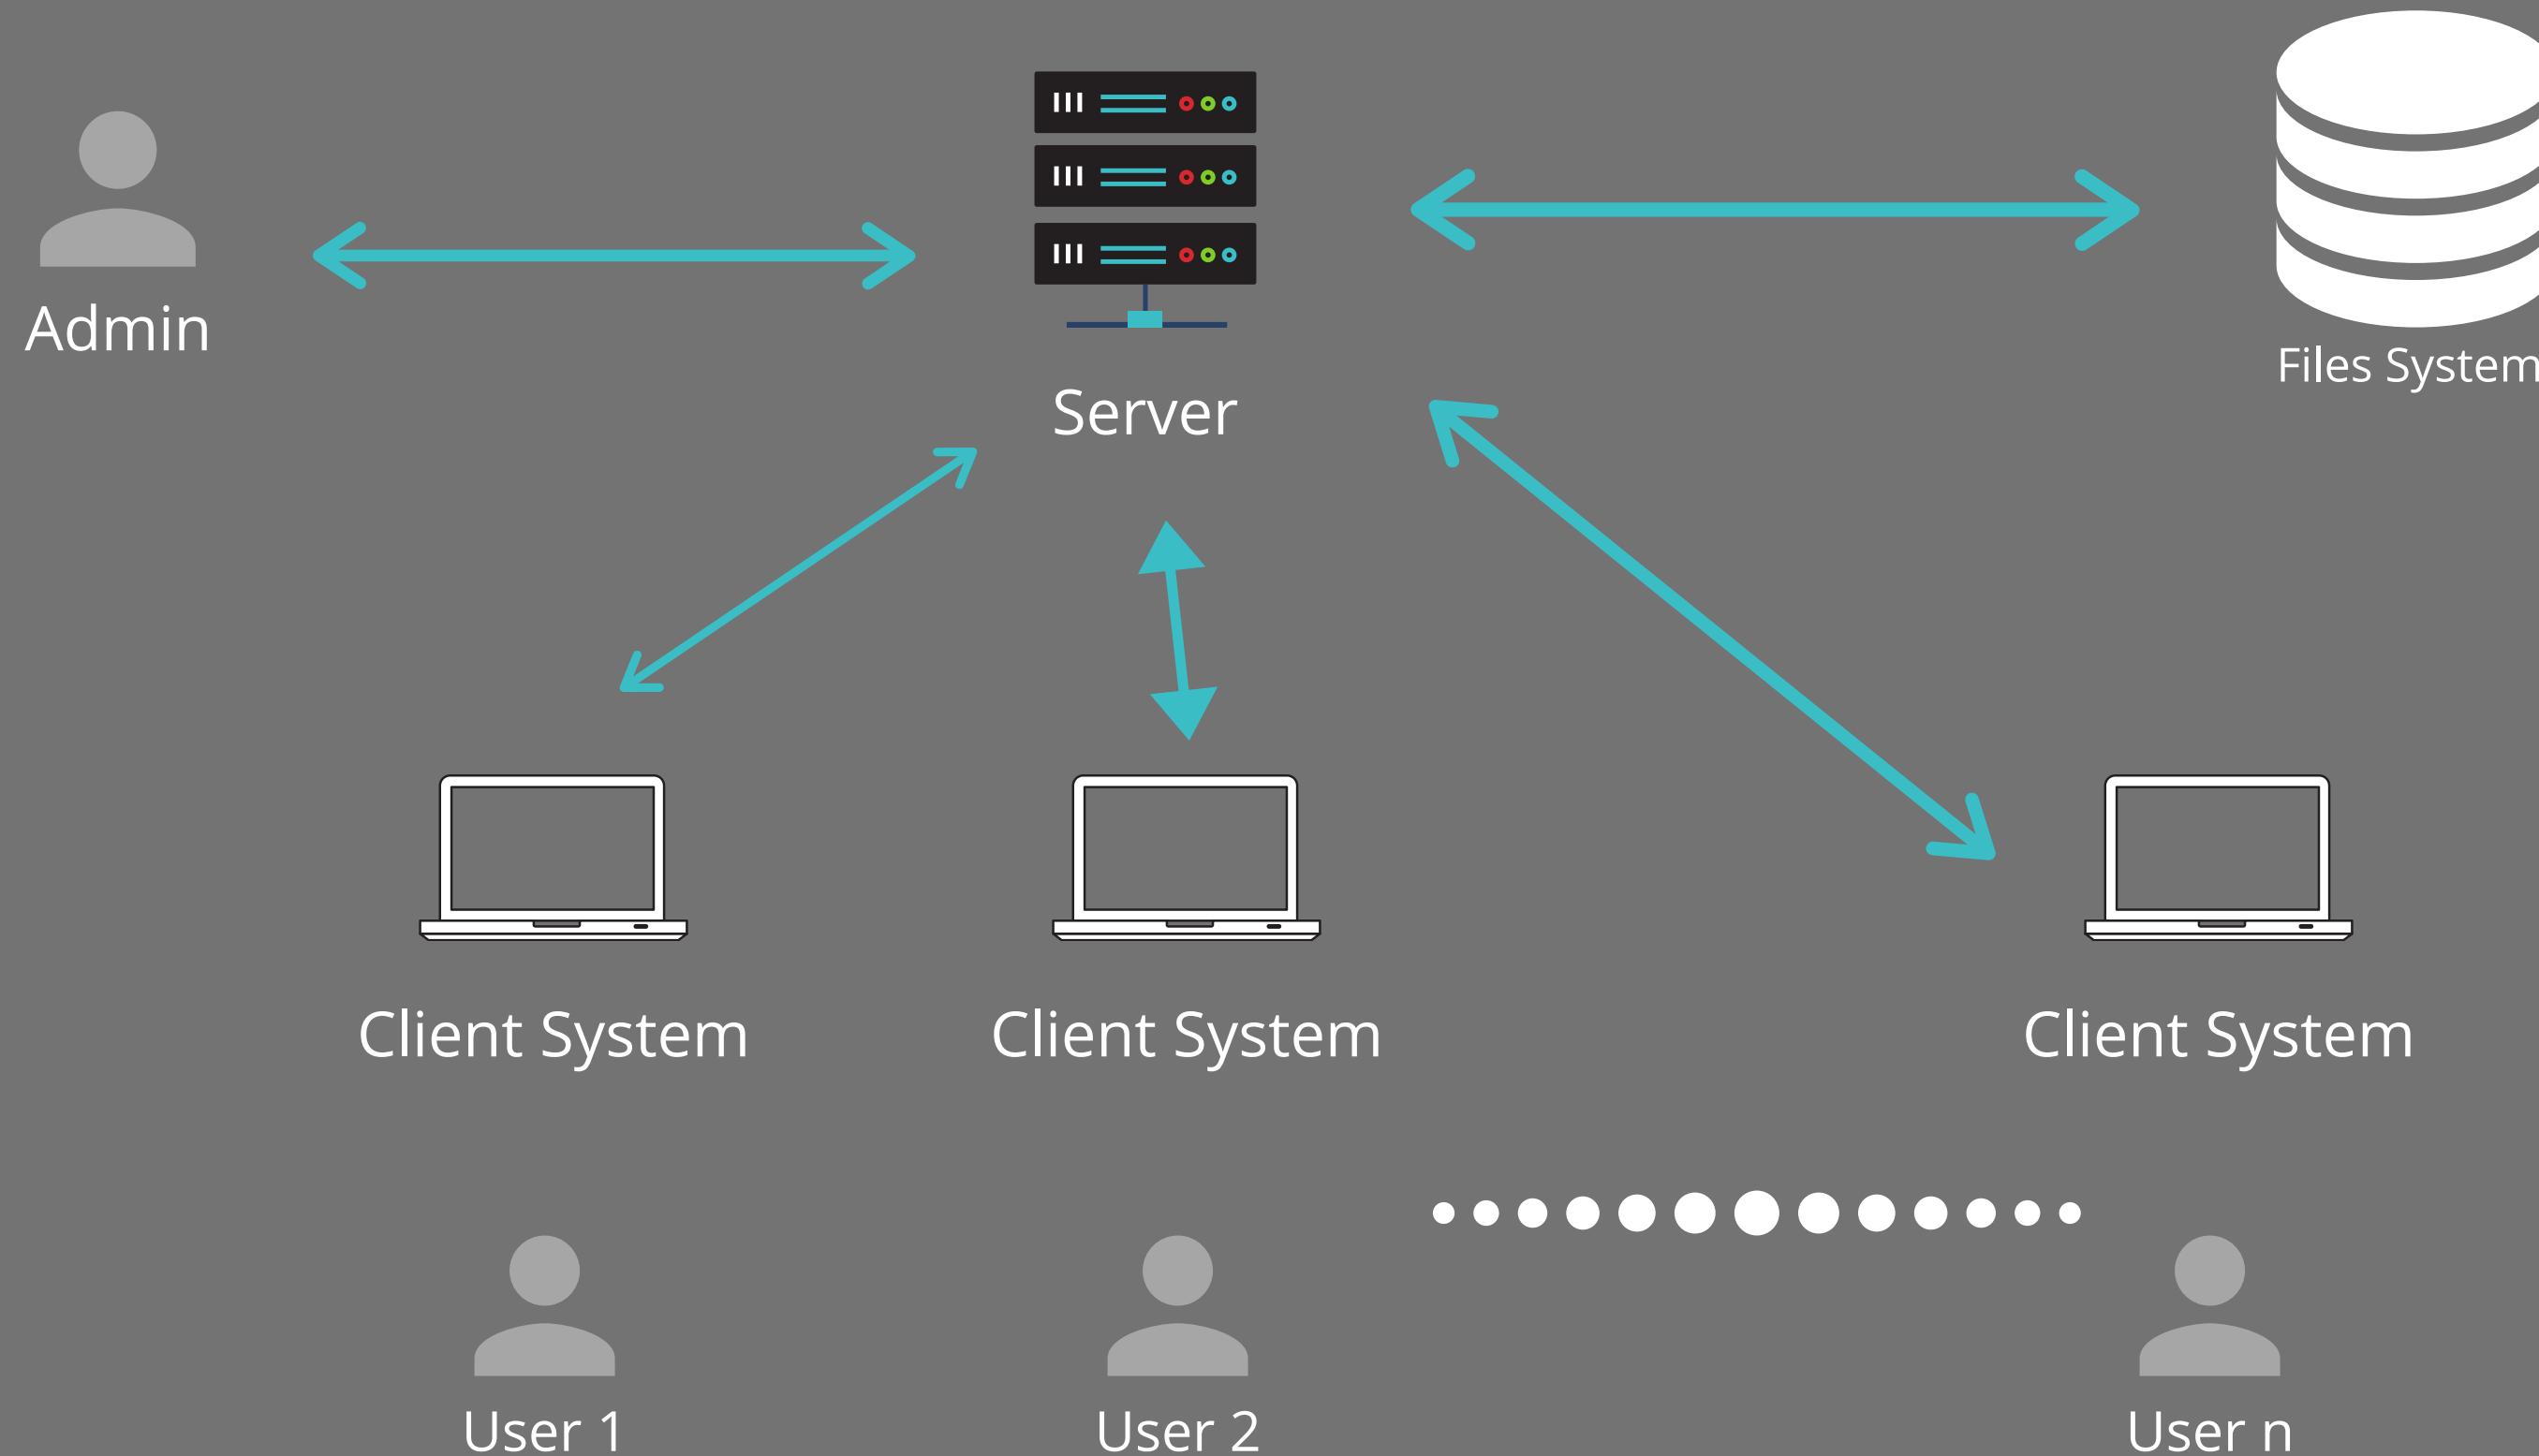

Lets view

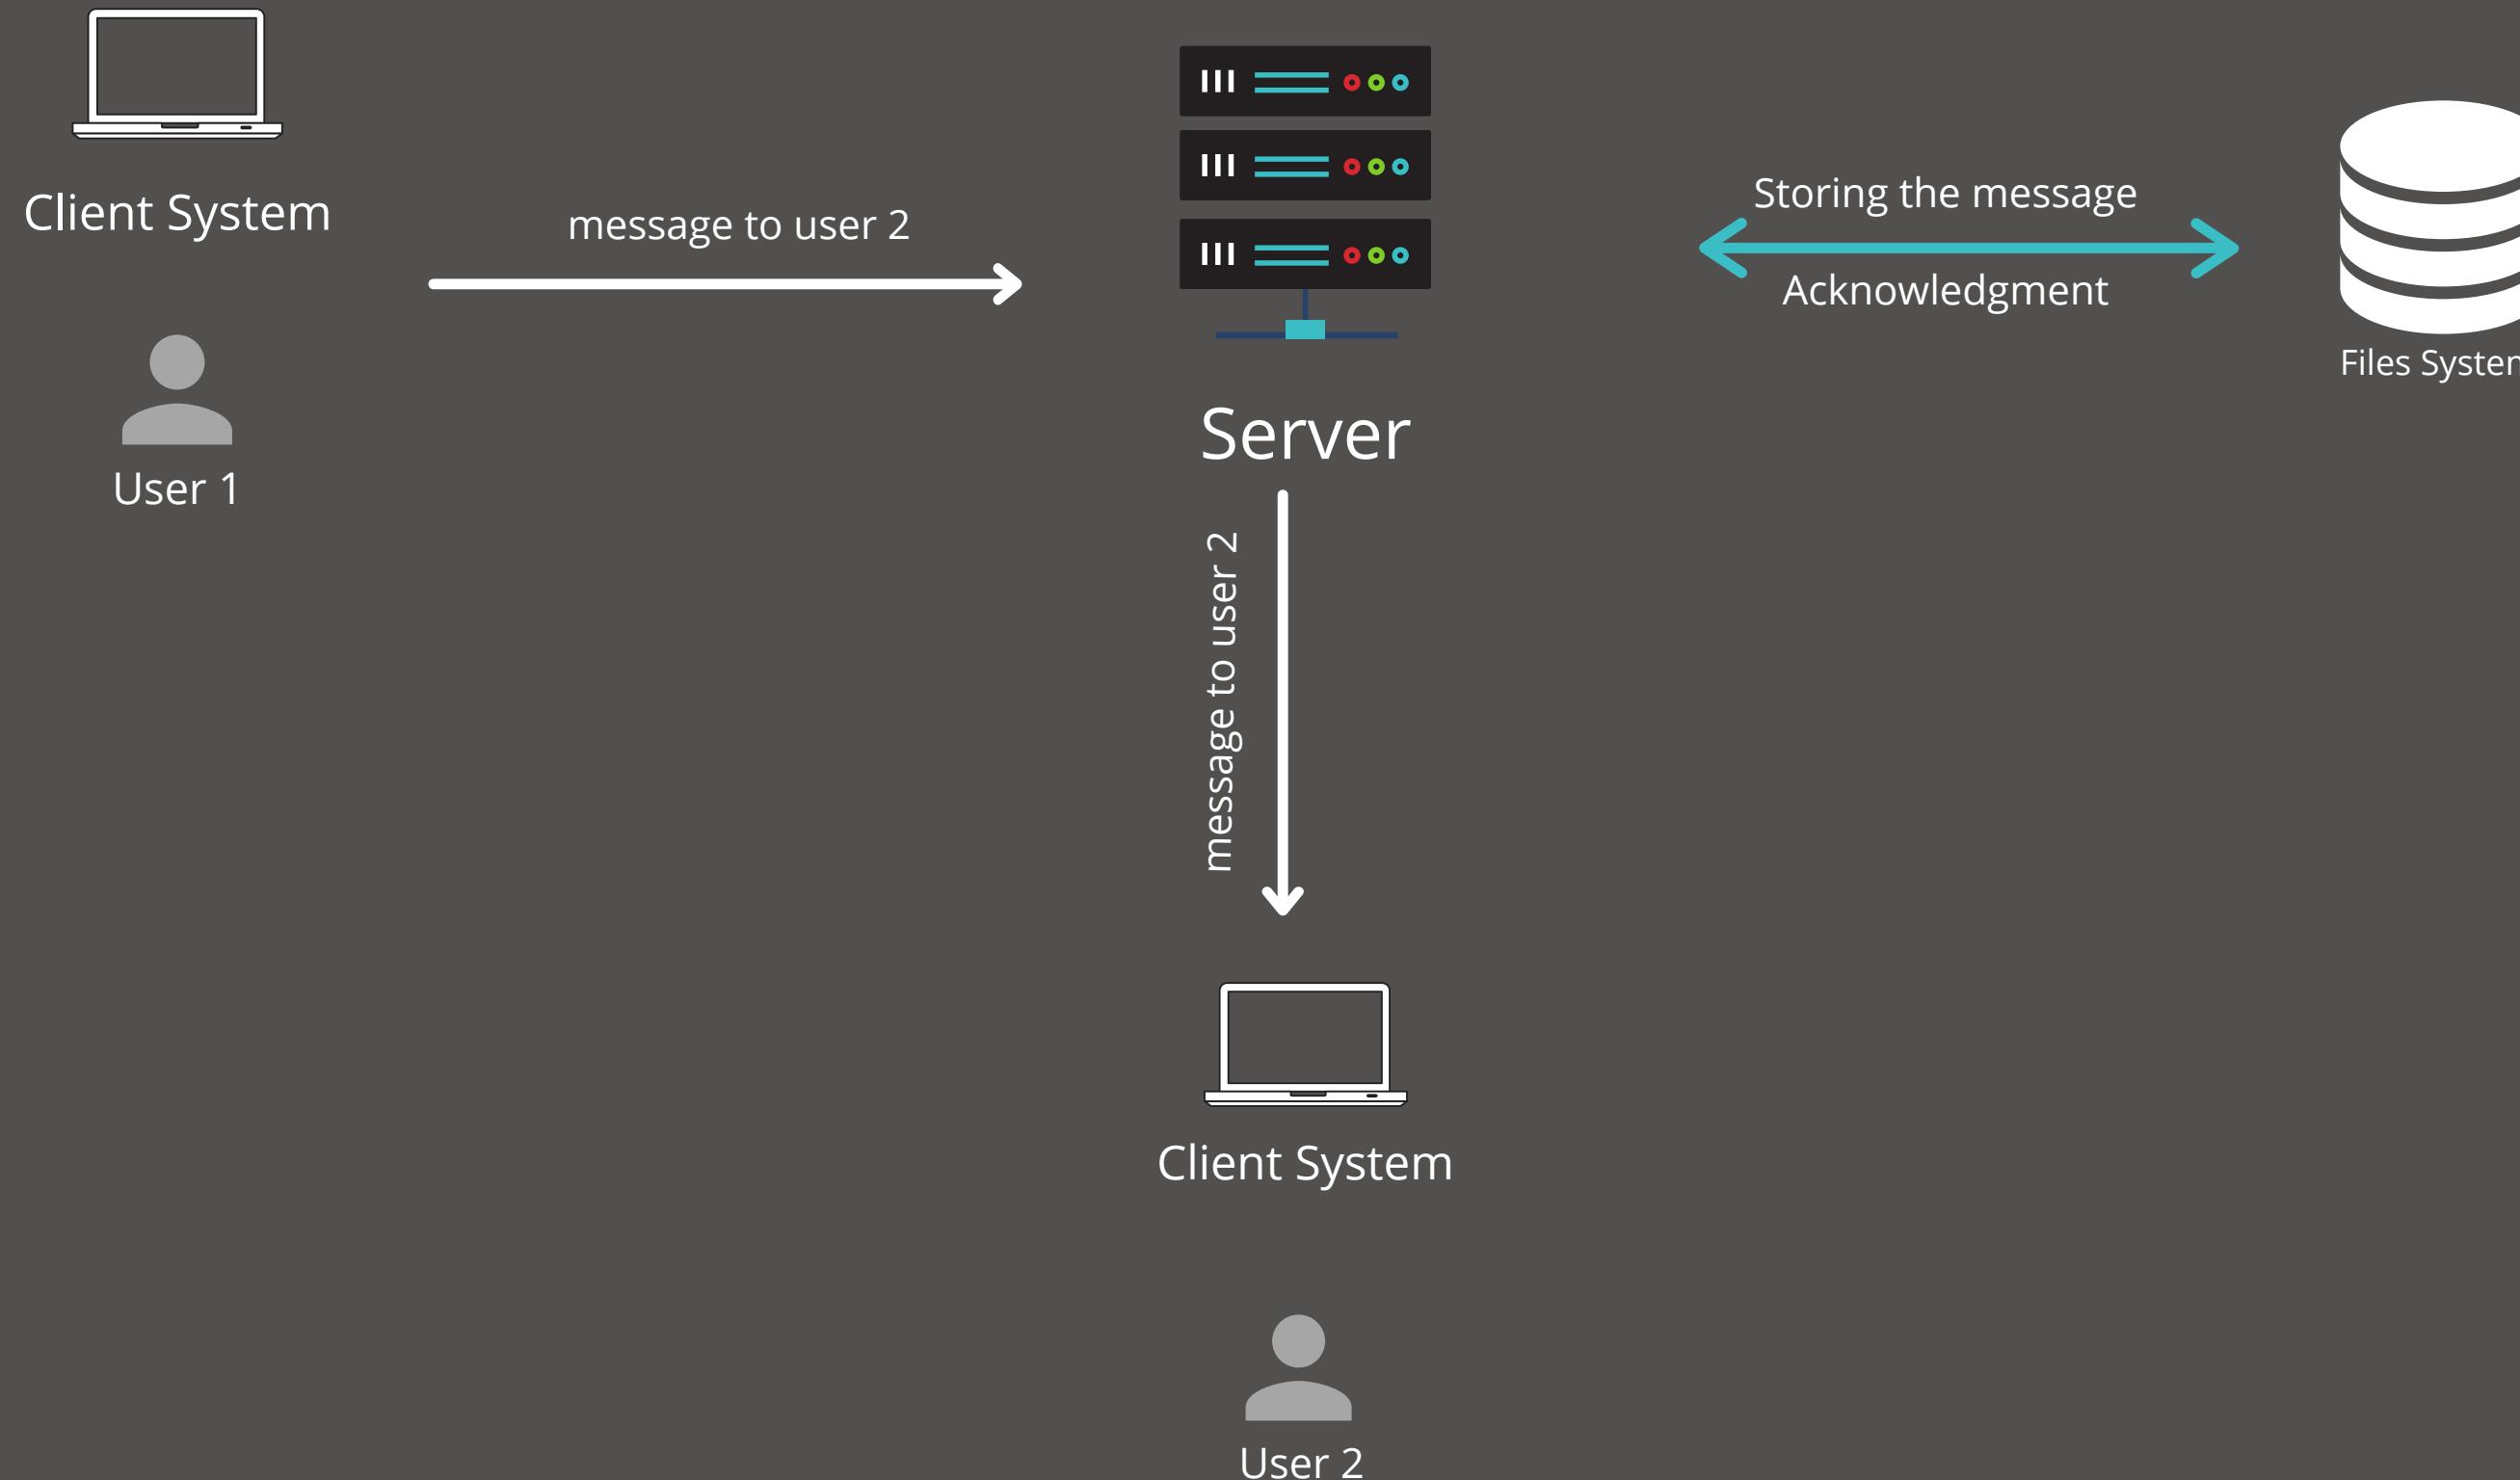

Technologies Used

System Architecture

Message Exchange Architecture

Security

- Users are enrolled manually
- No intruders

Conclusion

WE CAN CONCLUDE THAT

In the conclusion we could say that Proficient Communicator can replace the existing system i.e whatsapp and gmail while providing all its features with additional security.

Future Enhancements

As of now the application supports one organization but by providing higher computing power we can scale the application on a larger level.

Thank
you
